## **NEW RANGE OFFERS ULTIMATE CLOSING VERSATILITY**

Door control specialist Astra has launched the 4000 series of jamb-mounted, frame plate door closers to offer specifiers the ultimate versatility in powerful, adjustable, reliable closing for fire doors, high traffic settings and security-sensitive locations. Totally adjustable, even after installation, the Astra 4000 Series closers have been designed specifically for doors that require a continuous, controlled action into the latch, particularly fire doors.

The UK-manufactured 4000 Series range includes three different power size closers, all with easily adjustable speed: the 4001, 4002 and 4003. An ultra-compact high efficiency design makes the Astra 4000 Series the perfect choice for both new-build and refurbishment projects. They are ideally suited to a wide variety of applications including hotel bedrooms, office doors, residential dwellings, student accommodation and any setting with a reduced ligature requirement.

The Astra 4000 Series closers are tested and certified to all British and international performance standards and programmes, including FD30 & FD60 fire tests conducted in accordance with BS EN1634-1:2000 (test report CHILT/RF06118). It will allow specifiers to meet PAS 24 standards for residential entrance doors since it is Secured by Design (SBD) accredited. Astra 4000 series closers have also been successfully included in tests in both Halspan and Streboard core 44mm and 54mm doors and has successfully completed in house-testing to over 500,000 cycles.

The 4000 Series closers are easy to fit on right or left swing doors with the appropriate 9001-approved installation kit and, once fitted, are maintenance-free throughout their long life. Complete instructions supplied with products and kits.

Because they are completely concealed when the door is closed, Astra 4000 concealed offer specifiers, contractors and clients across the globe a really viable alternative to unsightly surface-mounted overhead closes which are so easy to vandalise, often costly, and frequently require maintenance and repair.

Astra is well known for its door closer range and the Lancashire-based company can demonstrate many years experience in the sector and carries out all of its own R&D in-house. It exports its British door closers all across the globe via a network of distributors and partner companies.
